

21082-EA000 Cooling Fan Clutch For Nissan Frontier Navara 21082 EA000

Our Product Introduction

For more products please visit us on automobile-sparepart.com

Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 21082-EA000
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
- Payment Terms: D/P, L/C, T/T

Product Specification

- Product Name: Cooling Fan Clutch
- Warranty: 12 Months
- Size: Standard
- Highlight: 21082-EA000 Cooling Fan Clutch , Nissan Frontier Navara Cooling Fan Clutch

Product Description

Product Description:

Cooling Fan Clutch: Regulating Your Engine's Temperature

The cooling fan clutch is a crucial component in automobile engines, playing a vital role in regulating the operation and speed of the engine's cooling fan. Located between the engine and the radiator, it is connected to the fan blades and works based on the engine's cooling needs.

This mechanical device is made up of a temperature-sensitive bi-metallic coil spring, a thermal sensor, and a viscous fluid coupling. Its main function is to control the fan's speed, ensuring that the engine stays at an optimal temperature for efficient operation.

When the engine is cold, the bi-metallic coil spring contracts, causing the fan to spin at a slower rate. This helps conserve energy and prevent the engine from being over-cooled. As the engine warms up, the coil spring expands, engaging the thermal sensor and allowing the viscous fluid to flow more freely. This increases the speed of the fan, aiding in the cooling of the engine and preventing it from overheating.

The cooling fan clutch is an essential component in maintaining the health and performance of your engine. Make sure to have it regularly checked and replaced if necessary to ensure optimum efficiency and prevent potential engine damage.

Features:

Temperature Control

Our fan clutch uses a precision-engineered thermal sensor to measure your engine's coolant temperature accurately. This sensor allows the clutch to engage and disengage at the right times, providing efficient cooling without wasting power.

Enhanced Cooling Efficiency

With a strong design and advanced technology, our fan clutch maximizes airflow through the radiator. This increased airflow helps dissipate heat more effectively, preventing engine overheating and maintaining optimal operating temperatures.

Durable Construction

Using high-quality materials and precise manufacturing techniques, our fan clutch is built for longevity and durability. It can withstand the demands of daily driving, extreme temperatures, and harsh conditions, delivering reliable performance over an extended period.

Smooth and Quiet Operation

Our fan clutch is engineered for smooth and quiet operation, minimizing vibrations and noise. This enhances your driving experience and ensures a comfortable ride.

Engineered for Performance

Designed to optimize your vehicle's cooling system, our fan clutch helps increase the efficiency of the radiator. This allows your engine to operate at its best and prevents potential damage caused by overheating.

FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .

2. How can we guarantee quality?

Always a pre-production sample before mass production;

Always final inspection before shipment.

3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years
