68960-0W290 Automobile Gas Spring for Optimal Vehicle Performance and Durability 68960-0W281

Our Product Introduction

For more products please visit us on automobile-sparepart.com

Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 68960-0W290
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
- Delivery Time: 3-35 days
- Payment Terms: D/P, L/C, T/T

Product Specification

- Name: Automobile Spare Parts
- Warranty: 12 Months
- Country Of Origin: China
- Size: Standard
- Type: Automobile Gas Spring

Product Description

Product Description:

The Automobile Gas Spring is an exclusive part engineered for automotive uses. It is specifically designed to offer regulated support and lift aid to diverse elements of a car.

Unlike ordinary springs, automobile gas springs employ compressed gas to produce force. This technology provides greater precision and control compared to traditional compression or tension springs. In automotive applications, gas springs are commonly used in trunks, hoods, and tailgates, where they serve to reduce the effort needed to open and hold these components in place.

The Automobile Gas Spring comes in a variety of types to suit different car models and applications. The most common types are the locking gas spring which can hold the component in a fixed position, and the non-locking gas spring which allows for movement along its stroke. These gas springs are made with high-quality materials that can withstand heavy use, extreme weather conditions, and corrosion.

In summary, if you need assistance in lifting or supporting certain parts of your car with ease, the automobile gas spring is a reliable and efficient solution. It is a specialized component that can simplify your overall car maintenance and operation.

Features:

Gas Spring Support and Lift Assistance

If you are looking for reliable support and lift assistance for your automotive applications, our Gas Spring is the solution you need. With its controlled force, it can hold open heavy components such as hoods, trunks, and tailgates, providing easier and safer access to your vehicle's storage areas.

The gas spring's smooth and effortless lifting and holding of objects in the desired position make it an ideal choice for automotive use.

Adjustable Force and Stroke

Our Gas Spring offers flexibility in terms of adjustable force and stroke to meet your specific automotive requirements. By adjusting the gas pressure or volume within the cylinder, the force exerted by the spring can be easily customized for different applications.

This flexibility allows for precise support and lift assistance tailored to the specific weight and movement characteristics of the component.

Damping and Motion Control

Our Gas Spring provides the added benefit of effective damping and motion control in automotive applications. With this feature, it helps minimize vibrations, noise, and impact forces that can affect the performance of your vehicle.

It is particularly beneficial in vehicle suspension systems, where it contributes to enhanced ride comfort and stability during operation.

Safety and Reliability

Your safety is our priority. That's why our Gas Spring is designed with built-in features to prevent uncontrolled or sudden movements. The valves that regulate the speed of extension and retraction in the gas spring ensure a safe and controlled operation minimizing the risk of accidents and injuries.

Durability and Longevity

Our Gas Spring is constructed with high-quality materials, such as steel or stainless steel components, that ensure durability and long-lasting performance. It is engineered to withstand automotive environments' rigors, including exposure to temperature variations, moisture, and vibrations, without compromising its functionality.

Easy Installation

Installing our Gas Spring in your automotive applications is easy, saving you time and effort in the process. The gas spring is designed to fit specific mounting points and interfaces, which makes for straightforward and hassle-free installation or replacement.

Technical Parameters:

Country of Origin	China
Size	Standard
Name	Automobile Spare Parts
Type	Automobile Gas Spring
Warranty	12 Months

Applications:

Upgrade Your Vehicle with Our Premium Automobile Gas Spring

Enhance your driving experience with our top-of-the-line automobile gas spring. With reliable support, lift assistance, and motion control in automotive applications, you can enjoy superior convenience, safety, and functionality on the road. Our premium gas spring is designed to deliver consistent and controlled force, ensuring a smooth and comfortable ride every time you get behind the wheel.

Experience Reliable Support and Motion Control

Our automobile gas spring is specifically engineered to provide dependable support and motion control in a variety of automotive applications. It is designed to be highly durable and long-lasting, ensuring that it can withstand the rigors of regular use on the road. With our gas spring, you can have confidence in its ability to provide reliable performance and enhance the functionality of your vehicle.

Trust in Durability and Performance

At our company, we prioritize the durability and performance of all of our products, and our automobile gas spring is no exception. Our gas spring is crafted with the highest quality materials and innovative technologies, resulting in a product that you can trust to meet your needs and exceed your expectations. Upgrade your vehicle today with our premium automobile gas spring and experience the difference in performance and functionality.

FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .

2. How can we guarantee quality?

Always a pre-production sample before mass production;
Always final inspection before shipment.

3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years
